

Richard S. Hollis
University of Illinois at Chicago

I am currently a post-doc at the University of Illinois at Chicago, involved in the PHOBOS and STAR experiments. I graduated a year ago (from UIC) with a thesis on global measurements of particle production, with PHOBOS. My involvement at RHIC dates back to 2000, when I began my PhD work, and have made frequent trips to the Lab as well as several long-term stays during the accelerator running.

As a nominee for the UEC committee, I would hope to continue the tradition of improving the quality of life of both employees and visitors to the Lab. As a recent graduate, I would hope to provide an impetus to improve both social and academic activities for students and post-docs onsite.
